

# Mailzen: Secure Container App For BYOD Mobile Device Management

## Overview

MailZen is a highly secure robust container app, supporting both Android and iOS, designed to provide a secure environment for corporate applications and data on personal devices. Ideal for organizations adopting BYOD (Bring Your Own Device) policies, MailZen ensures that sensitive company information is protected while allowing users to maintain privacy and usability with an easy-to-use container app.

## Key Features

### Data Isolation

Creates a secure virtual workspace, separating corporate data from personal data.

### Enhanced Security

Includes encryption and reinforced defenses against data leaks and unauthorized access.

### User-Friendly Experience

Easy to use and intuitive interface that allows seamless switching between personal and work applications while maintaining a high level of security.

### Regulatory Compliance

Adheres to privacy regulations such as GDPR, aiding organizations in meeting compliance standards.

### Integration with MDM Solutions

Can function independently or integrate with existing MDM systems for added flexibility for BYO, including In-Tune.

## Benefits For Stakeholders

### For IT Departments

- Simplifies management with easy onboarding and reduced support requests.
- Decreases administrative burdens compared to complex MDM solutions. Can be a third-party MSP offering.

### For Security Officers

- Provides robust encryption and strict data isolation measures.
- Helps ensure compliance with industry regulations.

### For CEOs and Executives

- Offers cost-effectiveness by minimizing MDM needs and utilizing employee-owned devices.
- Enhances employee satisfaction through privacy and flexibility.

### For End Users

- Allows personal device use without compromising security.
- Facilitates straightforward access to work applications in one app.

## Why Choose MailZen?

MailZen stands out as the ideal solution for modern mobile security needs for personal phones, offering organizations the ability to protect sensitive data while empowering employees who do not need to carry two phones. By opting for MailZen, companies can strengthen their mobile IT security, without burdening their IT resources. Not only email, but a range of applications that allow secure data processing including camera, notes, scanning options, editing, and internal on-prem file access.

## Specifications

### Platforms

iOS and Android

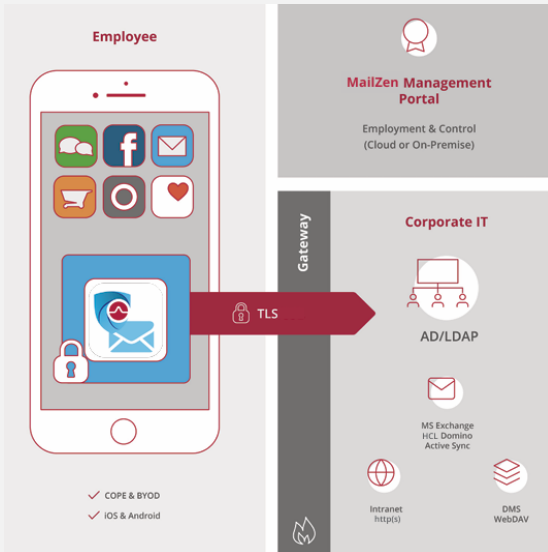

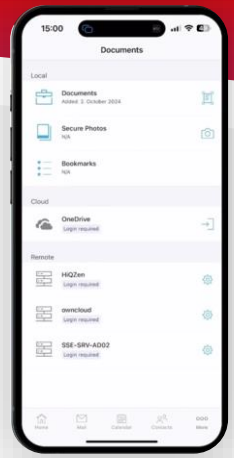

### Deployment

Complete Managed Service (hosted cloud based), On- Premise, or MSP hybrid solution with full management via a local management portal. Easy user onboarding with app downloads from Google Play Store or Apple App Store.

## Features supported

Supports Mail, Calander, Microsoft 365 applications (editing & viewing) , Contacts, Document Management, Sanner Option, Secure browser (also allowing other browser-based SaaS & CRM apps to be accessed), Camera & Notes. Secure document management is achieved locally on the mobile, via file shares or with company OneDrive with sync options, through the “**Secure Gateway**”, without need of any VPN connectivity, all in a single app.

MailZen implements an extra layer of encryption on any internal storage ABOVE the phone encryption.

PKI authentication - option to use a “client certificate” for the authentication on Exchange and for S/MIME E-Mail encryption using public/private keys.

IBM Domino and other MDM integrations possible.

Easy for admin to disconnect a user making the company data and apps immediately unavailable.

## What our customers say:

*“MailZen was easy to onboard to our customers and saves money for our clients as they do not need to buy and manage company phones. **MSP Customer**”.*

*“We need a way to control data for our non-technical freelancers and mobile workers, especially for GDPR for applications in addition to Office365. MailZen was the perfect fit. **Healthcare Company**”.*

*“We had MDM but our employees did not like us managing their personal devices. MailZen solved that issue for us and was surprisingly simple to implement. **Government Department**”.*
