

# Zao Cloud View

## Mobile Surveillance

Soliton's Zao Cloud View is a receiving platform that is used to receive, decode, display and record live streams from Soliton's mobile surveillance products. Cloud View can push live streams to other mobile devices such as laptops, tablets, iPads and smart phones for the video stream to be viewed in real time in a standard browser. Any device using a browser can view video either in HQ or remotely in the field. Soliton's mobile surveillance products includes the Zao, Zao-S and Zao Android App and can live stream fully encrypted.

Cloud View can be provided as a hosted cloud service or it can be installed "On-Premise".

The Cloud View Platform can be acquired in two different set-ups' depending on the requirement:
